

## Greetings

We regret to inform you that Inspection Support Services Inc. has decided to close down our business. Our last day of business will be on December 23<sup>rd</sup>, 2023. After that date, ISS (Inspection Support Services Inc.) will no longer be offering any kind of report products and education services that were offered by the company to our clients, customers and students.

Our last home inspector education program semester intake will be in April of 2023 to complete the current scheduled semester cadre. If required we will accommodate those that can complete their program by December of 2023.

The decision to close down this business was not easy, for a number reasons such the downturn in the home inspection market and education field and anti-competitive market conditions.

Over the years, we truly enjoyed the relationships with our customers and students.

We would like to thank all of our clients, customers, students and friends that we have engaged with in our business with over the past 25+ years. We could not have been as successful without your support and loyalty.

Thank you for being and believing in our company.

**Sincerely, the ISS Directors**

*Harry Jansen*

*Claude Lawrenson*
