

ISS Inc. Home Inspection Program – Course Registration Guidelines

In order to help you and ensure your success in the home inspection business, please consider the following recommendations.

- Have you completed a Secondary School Diploma or equivalent GED, OR are 19 years of age or older?*
- Do you have some experience in the construction industry? It is an asset for the technical nature of understanding housing and building construction systems.*
- Are you reasonably comfortable with self-study? All of our courses are currently delivered online in a blended learning format. What we do is go the extra distance by providing weekly webinars of contact with the instructor and the other course participants.*
- ISS Education uses web conferencing tools* to help instructors and students connect and collaborate live online. For online classes, students need to have a fully functional computer system with a webcam, speakers and microphone or headset and headphones, along with a reliable high-speed internet connection.*

If you are – GREAT! You do not need to apply to begin this program. First - start by ensuring you meet the admission requirements listed above and then register and pay for the courses listed in our Home Inspection Program – Education web page when they are offered. Note very similar to most every college program we offer the courses is a semester-based format. Check [here](#) for the current course offerings and webinars.

Ideally its best to sign up for a semester at a time, or alternatively the complete program. This helps in pre-registering in the next semester courses.

** Though the classes can be accessed using smartphones and tablets, we recommend using a laptop or desktop computer for a better learning experience.*

Need more info? Have any questions; find out how to [register for a course](#).
