Our Directors provide over 90 years of collective experience, representing a wealth of knowledge and expertise not just in inspections, but also with delivery of education and training. Additionally all of the Directors have been heavily involved in various programs and initiatives such as the National Certification Program, as well as volunteer work with Habitat for Humanity.

We believe in the saying that “knowledge is power” and we more accurately believe that includes sharing of our experience as “professional power”.

We look forward to serving you!
